

# Municipal Newsletter – April 2022

I want to know more about my municipality

## Temporary Carport

With spring upon us, it's time to think about taking down your temporary carport. The presence of a temporary carport within all setbacks and parking areas is permitted from October 1st of one year to May 1st of the following year under Bylaw 2013-060, and sections 206 and 368, so it is important to plan to remove it before the end of April.

It is possible to install a temporary shelter between May 1st and October 1st of the same year under certain conditions. The installation of a temporary shelter is authorized only if it is installed in the rear lateral margins and is **not visible** from a public or private road.

Thank you in advance for your cooperation!

## Reminder - Notice of Closing of Administrative Offices

Due to the Easter holiday, our administrative offices will be closed on Friday, April 15, 2022. Our team will be back to regular working hours as of Tuesday, April 19, 2022.

*A little history...* Easter egg hunts date from a long time ago. In some countries, it was considered to be the hare that laid the eggs in the garden. Hence, the custom of searching for them by organizing treasure hunts!

This activity is now very popular with children, and we can see that it is practiced in many countries!

## Earth Day

Every year, after the arrival of Spring at the end of March, we get to look forward to celebrating Earth Day on April 22nd. This day not only gives us a chance to appreciate all the nature that surrounds us in our beautiful municipality, but also to reflect upon our own impact on the environment and how we can improve it. To help, here are 5 tips and ideas of ways in which we can all make small changes as individuals that will make a difference:

1. Making sure you properly segregate your waste into recycling and compost in order to eliminate as much as possible any garbage that will end up in the landfill. Opt for buying items with sustainable packaging (or none at all!) or in bulk to diminish plastic consumption. Make sure to always bring your reusable shopping bag and water bottle!
2. Turning off or dimming outdoor and indoor lights to save energy and, not only will this help our local wildlife as lights can be obtrusive to their habitat, but it will also give you (and your neighbour) the extra benefit of seeing the stars brighter at night!
3. If possible, opt for public transportation or riding a bike. For regional travel take the train instead of driving or flying. And if it's hard to get around without a car - next time you're looking into buying one - opt for an electric or hybrid one.
4. Eat sustainably! Eating meat contributes to a significant carbon footprint. But if you like your summer BBQ too much to give it up entirely, opt for cutting out meat out of some (or most!) of your meals. Also make sure to buy

your food locally which not only eliminates the emissions from transportation but will also support your local neighborhood farmer.

5. Using eco-friendly and biodegradable products - like for cleaning - will ensure that we don't get all those nasty chemicals in the lake. Not only is it bad for the wildlife - many residents around Lac Manitou rely on its water for drinking. Same goes for your cosmetics - especially make sure to buy biodegradable sunscreen so you can enjoy those summer dips without harming the wildlife in our pristine lake!

There are plenty more ways to be environmentally conscious and if we all try to do our part with the help of these tips, as a collective they will make a difference. So, on this Earth Day, I urge you all to go for a hike, dim your lights, and have a veggie burger!

## Municipal Washing Station and Landing

The official opening of the washing station and municipal landing is scheduled for Thursday, May 5, 2021.

Prevention is the best option. Considering that scientific studies have proven that exotic invasive species can cause considerable damage, notably to flora, fauna, water quality, public health and the property value of waterfront buildings, we have ensured that measures are taken to maintain water quality.

Washing boats, trailers, nautical equipment and material is essential and MANDATORY for any types of boats.

An electronic communication will be sent to all owners having registered a motorized boat during the 2021 season with all the necessary information.

It is very important to make sure that your file is complete and that your payment is paid to the administrative team, prior to the scheduled launch. Use this email address to send your Interac payment to: [info@ivry-sur-le-lac.qc.ca](mailto:info@ivry-sur-le-lac.qc.ca)

## Message de la Sûreté du Québec

The *Sûreté du Québec* asks motorists and motorcyclists to be cautious. With the arrival of nice weather, motorists must once again share the road with motorcyclists. Everyone should adopt responsible and safe behaviour to reduce the risk of being involved in a collision. The end of March was particularly deadly with 5 people killed, including one motorcyclist. Wet pavement and loose gravel combined with changing temperatures can reduce tire traction and can increase braking distances and the risk of losing control.

Let's be vigilant on a motorcycle as well as in a car!

## The wildlife crossing and the *P'tit Train du Nord* are standing out

*Ici Explora* dedicates a very nice article on it, use the link below to view the article.

## Sport fishing – What can you keep?

According to the *Ministère des Forêts, de la Faune et des Parcs*, in Ivry-sur-le-Lac, which is located in zone 9, as elsewhere in Québec, sport fishing is permitted. However, it is important to remember the daily catch limits as to the number, size and weight of fish you can keep. Here are the rules that apply to all the waterways on the territory as well as additional rules specifically for Lac Manitou.

## Welcoming Immigrants

We all have a role to play in welcoming immigrants who choose to settle in our beautiful region by being a good neighbor, a business that welcomes diversity, and a municipality that knows the richness of its citizens' backgrounds. Newcomers contribute positively to our economy by filling jobs that are in great shortage. Our businesses need these valuable employees. When immigrants are welcomed, everyone benefits!

# ICI, NOUS SOMMES ACCUEILLANTS ET ACCUEILLIS

*En chacun de nous,  
des parcours inspirants à découvrir!*

**SAVIEZ-VOUS QUE...**

- La MRC des Laurentides accueille environ 4,4 % de personnes immigrantes au sein de sa population totale.
- 67 % de l'immigration sur notre territoire provient de l'Europe suivie de 15 % des Amériques.
- La majorité des personnes immigrantes dans la MRC des Laurentides se trouvent dans la tranche d'âge de 25 à 54 ans.
- L'immigration contribue à la population active de notre région!
