

Municipal Newsletter – August 2022

I want to know more about my municipality

Notice of change of schedule at the municipal landing

We wish to advise the citizens that the schedule of the municipal landing and the washing station had to be adjusted due to lack of personnel. The change in schedule began on August 8th.

Wednesday to Sunday, from 9am to 5pm
Monday and Tuesday, closed

Thank you for your understanding, and contact the administrative team if this creates a major issue.

Distribution of Wood Chips

We wish to inform the citizens who wish to do so, that it is still possible to obtain wood chips free of charge. Just bring your bags or bins and come to the municipal garage at 628 chemin de la Gare.

Municipal Garage - Not an Ecocentre!

We notice that some citizens come to the garage to deposit residual materials that should be brought to the *Ecocenter*, which is prohibited. We only accept residual materials that are accepted in the different bins.

It is the citizen's responsibility to dispose of materials that do not fit in the bins and to drop them off at one of the region's *Ecocentres*. You can make up to 26 visits to the *Ecocentres* each year.

Also, we would like to remind you that the municipality does not offer any collection of large garbage, so you must also bring them to the *Ecocenter*, or mandate a supplier to do so.

We appreciate everyone's cooperation,

Closing of our administrative office - Labour Day

Please note that our administrative offices will be closed on Monday, September 5 for Labour Day.

The entire team will be back on Tuesday, September 6, starting at 9:00 a.m.

Thank you.

Region's Organization

Services offerts

- Ligne d'écoute téléphonique
- Site web, Facebook, Twitter
- Cours d'activités physiques adaptés aux personnes atteintes
- Groupes de soutien dans différents secteurs des Laurentides, afin de briser l'isolement

Reminder – Not plastic bag in the brown bin!

The municipality offers its citizens free paper bags!

Simply come to the municipal garage or to the reception of the City Hall and we will be pleased to give you a package of 10 compost bags.

PAS DE SAC PLASTIQUE COMPOSTABLE DANS MON BAC BRUN !

MÊME S'ILS COMPORTENT CES LOGOS :

Les contenants en plastique « compostables » sont également **REFUSÉS.**

TOUT TYPE DE SAC EN PLASTIQUE EST REFUSÉ

Écoulez votre inventaire en les utilisant comme sacs à ordures.

Pour voir la liste détaillée des matières acceptées et pour des astuces liées à la gestion du bac brun, consultez l'onglet **MATIÈRES ORGANIQUES** sur le site Web :

TRAINDEVIEDURABLE.com

ALTERNATIVES au sac en plastique « compostable »

Le papier journal peut être plié et servir de fond pour votre contenant.

En vrac dans le bac !

Sac en papier du marché.

Congeler les résidus alimentaires évite les odeurs.

Sac en papier *Sac au Sol*. Résistant aux fuites !

* Certaines municipalités offrent des sacs en papier résistants, vérifiez auprès de votre municipalité.

Reminder – Due to a shortage of truck drivers, the RITL was forced to reduce the collection frequency of the brown compost bins from every week, to every two weeks.

Summer Activities

Mont-Blanc, July 22, 2022 - On July 21, 2022, the MRC des Laurentides inaugurated the Ancienne pisciculture public site simultaneously with its partner Sentier des cimes Laurentides, whose treetop walkway and observation tower are unique in eastern North America. This remarkable partnership between the MRC des Laurentides and EAK Sentiers des cimes Inc. has made it possible to preserve the heritage of the former fish farm and create a spectacular new ecotourism destination in the heart of the Laurentian Forest. The long-awaited inauguration took place in the municipality of Mont-Blanc in front of nearly 200 people from the political and tourism communities and the region's partners.

We invite you to consult the link to learn more and get your tickets!

Nature and Wildlife

Although it is the most common of its species, the somewhat elusive Great Blue Heron is sometimes hard to spot as it is quite skittish around humans. It conceals itself in marshes and wades near shorelines of lakes and streams, looking for its next meal. It will patiently stand still until the right moment to strike from a distance thanks to its long neck. Though its diet mainly consists of fish, it will eat anything from insects to small amphibians, reptiles, and mammals, which it swallows whole in one gulp!

With its impressive 6-foot-wide wingspan, it's easy to see in flight how it's the largest heron in North America. Despite its size, the Great Blue Heron only weighs about 5 to 6 pounds because of its hollow bones. During breeding season, its mostly grey feathers will take on a more blueish hue, and its beak will go from yellow to orange, and its eyes will turn more red. Both parents take turns incubating the eggs and once the young are hatched, they also take turns feeding them. They learn to fly at 2 months and as adults can reach speeds of 50 km/h. No wonder they are so hard to spot!

MRC des Laurentides - Call for proposals

The *MRC des Laurentides* invites artists and cultural organizations to carry out an awareness project on good practices for the recycling bin to help promote accurate information on the materials accepted in the bin within its local municipalities.

Other Subjects of Interest

Should you have other topics you would like us to address in a future municipal Newsletter, just let us know and it will be our pleasure to address them.

I wish to highlight the contributions of **Councillor Gabi Opas** in addition to the efforts of Mylene Thibault for the preparation of the newsletter.

Should you have any questions, please do not hesitate to ask. The municipal team is here for you!

Once again, thank you for your trust; it is a real pleasure to represent you!
