

## NEWS LETTER – JULY 2026

### FOLLOW-UP ON DISCUSSIONS FROM THE JULY 2026 CAUCUS

#### ITEMS ON THE AGENDA FOR THE CAUCUS MEETING ON JULY 13, 2026:

**Mandate granted to the law firm DHC** in case 700-17-022626-260;

**Renovation** of the municipal garage;

**Authorization** to apply for a grant from the MTQ for the reconstruction of Chemin du Lac de la Grise;

**Approval of RIDM** Bylaw 112 for the purchase of a fire truck at a cost of \$672,000;

**Request for an exemption** from the ministries regarding arboriculture certification requirements for municipal employees;

**Mandate to the Union of Municipalities** for the consolidated purchase of various bins;

**Subdivision project:** acceptance of park fees in cash or land;

**Minor variance** regarding 286 Chemin Labelle authorizing the construction of a detached garage 4 m rather than 9 m from the rear property line and a greenhouse 2 m from the garage;

#### Notice of Motion for Proposed Bylaws

**Notice of motion** for Proposed Bylaw 2014-070-1 amending Bylaw 2014-070 establishing the Urban Planning Advisory Committee of the Municipality of L'Ivry-sur-le-Lac;

#### Adoption of Bylaws

**Adoption** of Bylaw 2026-177 on the use of pesticides and fertilizers;

**Adoption** of Bylaw 2026-178 amending Bylaw 2013-059 concerning Permits and Certificates.

All draft ordinances can be found on the municipality's website at <https://ivry-sur-le-lac.qc.ca/reglements/>

**THE REGULAR COUNCIL MEETING WILL BE HELD ON MONDAY, JULY 13, AT 6:00 P.M.**

### COUNCIL MEETING OFF AUGUST 17, 2026

The next council meeting will be held, on Monday, August 17, starting at 6:00 p.m. The mayor and council members will welcome you at City Hall, located at 601 Chemin de la Gare. You may also attend via videoconference. We invite you to review the public notice, which will be published in early July, for full details. <https://ivry-sur-le-lac.qc.ca/nouvelles-et-avis-publics/>

## PUBLIC WORKS – STREET ADDRESSES

Regulation 135-96, which requires that every building within the municipality of Ivry-sur-le-Lac be identified by a house number, is not being followed by everyone. We remind you that identifying your residence or any other building is of the utmost importance in an emergency, and we recommend displaying a house number on the front of the building.

Here are some guidelines to follow in the event that emergency services need to respond to your home. The house number must be easily visible from the public road day and night, using lighting or reflective material. It must also be maintained during inclement weather and visible from both directions of traffic. If the residence is located more than 30 meters from the road, it is best to display the house number along the edge of the roadway.

We are committed to the safety of our residents. We recommend displaying the house number on the front of the building.

---

## PONT DUPÉRÉ

### DUPÉRÉ BRIDGE

#### NEW WEIGHT LIMIT AND NEW SIGNAGE

Ivry-sur-le-Lac, July 8, 2026 – We would like to inform you that the Ministry of Transportation and Sustainable Mobility has reduced the weight limit to 5 metric tons on the Dupéré Bridge located on Chemin du Lac de la Grise and has installed new signage that will restrict traffic to a single lane.

We ask that you exercise extreme caution.

## ENVIRONMENTAL INCIDENT - LAKE MANITOU

A regrettable environmental incident occurred on Sunday, July 5, 2026, in Lake Manitou.

At approximately 5:07 p.m., 911 received a call reporting that large quantities of Styrofoam pellets had been dumped into Lake Manitou and onto its shores.

Our water patrol officers, accompanied by the RIDM Fire Department installed a band to contain the spill in the lake and along the shores.

On July 7, 2026, a certified company came to remove the beads from the lake and the shores.

**AVANT**

**APRÈS**

## PRECAUTIONARY NOTICE TO SWIMMERS: BE AWARE OF BIRDS

### BEWARE OF BIRD DROPPINGS ON THE BEACHES

The presence of birds on the beach can lead to accumulations of droppings near the shoreline. As a precaution, these droppings may contain microorganisms that could cause discomfort or infections if they come into contact with the mouth, eyes, or an open wound.

#### TO ENSURE EVERYONE'S SAFETY, WE ASK BEACHGOERS TO:

- **avoid** swimming in areas where bird droppings are visible;
- **keep** children away from contaminated areas and supervise them while they play in the sand;
- **do not touch** the droppings and avoid any contact with contaminated water or sand;
- **wash your hands** after swimming and after any activity on the beach;
- **report** any significant accumulation to site staff.

**THANK YOU FOR YOUR COOPERATION: YOUR VIGILANCE HELPS KEEP THE AREA CLEAN AND ENSURES EVERYONE'S HEALTH.**

---

## THE WATER PATROL ON LAKE MANITOU

The water patrol officers in Ivry-sur-le-Lac are not mere observers. Appointed by resolution of the City Council (Resolution 2026-04-064 of April 20, 2026), they are designated as officers of the authority under subsection 196(1) of the Canada Merchant Marine Act, 2001. As such, they are duly authorized by the Director of Criminal and Penal Prosecutions (DCPP) to issue notices of violation under the Contraventions Act.

Their mandate covers the enforcement of several federal laws and regulations, including:

Part 10 of the Canada Merchant Marine Act, 2001;  
the Small Vessel Regulations;  
the Vessel Use Restrictions Regulations;  
the Recreational Craft Operator Competency Regulations.

### A Role in Serving Public Safety

The primary mission of the water patrol officers is to ensure the safe coexistence of all users of Lake Manitou: boaters, swimmers, kayakers, paddlers, and lakeshore residents. Their visible presence on the water helps to:

- **Prevent dangerous behavior**, such as excessive speed, reckless boating, or failure to comply with restricted zones;
- **Raise awareness** among users about current recreational boating regulations;
- **Respond quickly** in the event of a risky situation or a confirmed violation;
- **Protect the lake environment by limiting the negative impacts associated with unregulated boat use.**

### Respect: A Fundamental Value

The presence of patrol officers on Lake Manitou is based, above all, on a culture of mutual respect. Respecting boating rules means respecting your neighbors, vulnerable users on the water, and nature.

Residents and visitors are encouraged to cooperate with the patrol officers by acting responsibly and welcoming their interventions, which are intended solely for the common good. The patrol officers, for their part, carry out their duties with professionalism, courtesy, and impartiality.

### A Dedicated Team Under Municipal Supervision

For the 2026 season, the water patrol consists of seven municipal patrol officers. Throughout the summer season, this dedicated team works to ensure that Lake Manitou remains a safe, enjoyable, and respectful environment for everyone.

*"Let's take care of our lake together."*

## CLOSURE AT THE LANDING AND SCHEDULE

It is very important to make sure that the **gate at the dock is securely closed** when you leave.

**Tuesday, May 12 through Sunday, June 28**

🕒 8:30 a.m. to 4:30 p.m.

📅 7 days a week

**Monday, June 29 through Sunday, September 6**

🕒 8:30 a.m. to 4:30 p.m.

📅 5 days a week—Wednesday through Sunday

**From Monday, September 7, until closing on Sunday, October 18**

🕒 8:30 a.m. to 4:30 p.m.

📅 7 days a week

## DID YOU KNOW? THE MOVEMENT OF WATER IS NATURAL

Our rivers and streams are dynamic: they are constantly changing, influenced by the seasons, precipitation, topography, and soil type. They carry not only water but also sediment—such as sand, soil, or pebbles—that travels with the current.

The balance of a watercourse depends mainly on two factors: the amount of water (the flow rate) and the amount of sediment transported. When this balance is maintained, the river can shape its bed in a stable manner, sometimes slowly changing its course or forming meanders.

One phenomenon that can be observed is the accumulation of sediment where a river flows into a lake. This deposition is a natural process resulting from the water slowing down and releasing the particles it was carrying.

When humans alter a watercourse—for example, by straightening it, stabilizing its banks, or building a dam—natural processes are disrupted. The watercourse then seeks to regain a new balance, often by increasing erosion or changing its course elsewhere. Although these adaptations are normal responses, they can sometimes create unexpected challenges downstream or around the modified site.

Understanding these processes helps us coexist more harmoniously with our aquatic environments and respect their natural functioning. Human interventions have their limits, because nature always follows its own course

---

## SAFE FISHING ON LAC MANITOU

**Did you know that a fisherman can lose 11-15 jigs and sinkers per year?** This is dangerous if the tackle is made of lead or mercury.

**Why is this a problem?** Lead is a highly toxic metal seriously affecting humans and waterfowl. Even low doses of lead exposure over time can lead to multiple health and cognitive

impairments in humans, seriously affecting the nervous and reproductive systems. Loons mistake the sinkers for pebbles (which they normally eat for digestion). Or they will eat fish that harbour lead tackle. This is a major cause of death in Common Loons. Ingesting them can cause blindness, muscle paralysis, reduced ability to reproduce, seizures and death. Other waterfowl such as ducks are also poisoned when eating lead sinkers.

**Are there laws prohibiting lead tackle?** Lead fishing tackle is prohibited in Canada's national parks and wildlife areas. However, our Lac Manitou can continue to be polluted by lead fishing tackle that has been lost.

**Can we fish in a safe way?** Good news! It is safe to use sinkers and jigs made from materials such as tin, bismuth, antimony, steel, brass, tungsten, terpene resin putty and polypropylene. They are easily available.

**Thank you** to all fishermen who use safe tackle, thus keeping our **Lac Manitou** free of additional lead and protecting **people** from lead exposure and **loons/waterfowl** from toxic death.

## EXPANSION OF THE AREA AT RISK FOR LYME DISEASE IN THE LAURENTIDES REGION

The Laurentides Public Health Department is informing the public that the risk of contracting Lyme disease is now high throughout almost the entire Laurentides region, with the exception of the following areas in the far north: Lac-Akonapwehikan, Lac-Bazinet, Lac-De La Bidière, Lac-de-la-Pomme, Lac-Marguerite, Lac-Oscar, and Lac-Wagwabika.

As of now, the vast majority of the Laurentides region is at risk of black-legged tick infestations; these ticks may be infected with bacteria and transmit Lyme disease and, more rarely, anaplasmosis and babesiosis. Lyme disease continues to spread in

several other regions of Quebec.

### Preventive Treatment for Lyme Disease

If you have been bitten by a tick in a high-risk municipality, an evaluation by a doctor or pharmacist may allow you to receive a preventive dose of antibiotics before symptoms appear. You can view the list of affected municipalities using the Map of Lyme Disease Endemic Areas in Quebec.

### Protecting Yourself Against Tick Bites

The best way to avoid contracting Lyme disease is to prevent tick bites during outdoor recreational or work activities. Ticks do not jump, fly, or drop from high up on a branch. However, they can latch onto a person or a pet that comes into contact with tall grass, shrubs, or other vegetation in a garden, park, forest, wooded area, or along the shore of a lake or river.

For more information on preventive measures, how to safely remove a tick, and what to do if you're bitten, visit [santelaurentides.gouv.qc.ca](http://santelaurentides.gouv.qc.ca) and go to the Public Health and Infectious Diseases section: Lyme Disease.

## SOPFEU REPORT - JUNE 2026

Le mois de juin s'est conclu de manière orageuse.

#### Intensive Protection Zone:

- 74 fires and 14,476.1 hectares burned

#### Northern Zone:

145 fires and 140,958.5 hectares burned

#### The causes of these fires are:

- 41% caused by lightning
- 19% to be determined
- 18% other causes
- 7% caused by campfires

- 7% from cigarette butts
- 5% from forestry and industrial operations
- 3% from the burning of waste

It is recommended that you always check the restrictions in effect before lighting a fire
